ESCS (European Supply Chain Security)

New goals for 21st century Logistics

New challenges and new business horizons need new solutions, adapted to the changes in the socio-economic environment.

ESCS (European Supply Chain Security) is the first Secure Logistics Community aimed at developing the Logistics and Industry sector to reach these proposed goals.

ESCS Secure Logistics Chain

General Information

ESCS, Secure Logistics Community, is a platform to promote and improve supply chain security, which helps to achieve secure and quick trade and logistics by complying with international customs regulations and applying the best international practices concerning World Trade security.

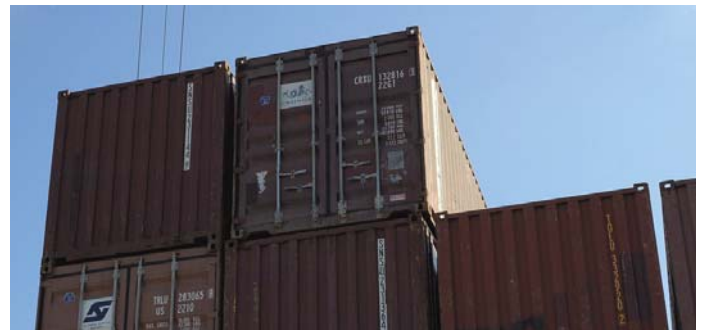

ESCS Objectives

ESCS, the Secure Logistics Community contributes to the permanent exchange of experiences and information regarding matters of security, and it has become the reference work tool to guarantee the use of a secure supply chain.

Association of operators - suppliers

The cooperation between suppliers and operators helps to increase security awareness and to continuously perfect and coordinate the work practices and methodologies, providing accurate and necessary controls in each phase of the industrial and logistic operations, with the aim of minimising the inherent risks, detecting suspicious fraud activities and helping quick growth which is necessary for world trade development.

ESCS European Supply Chain Security

ESCS, European Supply Chain Security was formed on the initiative of the founders and promoters of the platform and with the collaboration of various Logistics, Industry and Trade companies with the aim of helping to achieve the objectives of the platform, and aligning the interests of the main agents of Secure Trade and Logistics – the Authorised Economic Operators (AEO) – and the industrial and security services suppliers.

ESCS Cadena Logística Segura

General Information

The companies listed on the European AEO register have demonstrated before the European Authorities of each country that they comply with the requisites to be considered reliable companies for the supply chain. Operators with long-term commitments to strengthen international trade in a quick, secure way by applying internationally recognised security standards and procedures.

Objective of the Platform

The following are among the ESCS objectives::

- To improve the connection of Secure Operators for the Supply Chain.
- To increase the culture of security and protection in international trade.
- To promote and develop the creation of secure supply chains.
- To manage the best security practices.
- To establish feasible security standards.
- To strengthen the connection between the private sector and the Administration.

Join the Secure Logistics Community

The development of the platform needs the contribution of each and every one of the interested parties. If the development and defence of reliable, transparent and secure Trade is among your business priorities, we would like you to join the platform.
